

# 2016 UA Design-Build Team

## Selected as

### DBIA Western Pacific Region Finalist

In our first year of competition, the University of Arizona Design-Build team called *The DB Wildcats*, were among the nine Regional finalists in the [2016 National Design-Build Student Competition](#) sponsored by the [Design-Build Institute of America \(DBIA\)](#). *The DB Wildcats* included: Robert Melvin (CAEM), and Kevin Yingst (Architecture), Tasanee Durrett (Architecture), Nicholas Tritz (CAEM), and Luis Flores (CAEM). This year, 31 teams from 23 universities entered the competition to demonstrate design-build best practices by proposing a delivery solution to design and construct a parking facility with a recreational field and classrooms on a liberal arts college campus. This extracurricular activity is part of the [construction focus](#) in CAEM. We are proud of *The DB Wildcats* and look forward to their future accomplishments.
